**Run by railway people,
for railway people**

RAIL INFRASTRUCTURE

A member of the Railway Industry Association and RISQS verified supplier, AARC Professional Services is a railway consultancy that supports all aspects of Rail Infrastructure, with a specific focus on operational assets.

Drawing from over five decades of industry experience, our expertise in Rail Infrastructure helps our clients to achieve outstanding results in a range of disciplines including:

**RAIL
ENGINEERING
MANAGEMENT**

**RAIL
MAINTENANCE
MANAGEMENT**

All of our consultants share a common goal to bring out the best in our rail industry clients, through a professional, collaborative and friendly though determined approach.

From asset strategy, feasibility reviews and interface management through to access planning, change/performance management and maintenance readiness, we have the experience and expertise to help you deliver outstanding outcomes.

What our clients' think...

Following the introduction of a new standard for railway electrification, SPL Powerlines turned to AARC Professional Services to support a major piece of work to redesign a construction assurance process, develop usable and repeatable plans for reference and ensure consistency of approach.

“ The AARCPS team were a pleasure to work with and provided SPL Powerlines with a highly motivated and very knowledgeable team to achieve the numerous deliverables set out in our original agreement.

Their collective knowledge and experience provided us with real confidence that our redesigned system was industry leading and fit for purpose. The close working between client and consultant was also an excellent example of how to work together to deliver wide-ranging project deliverables, on time and to budget

”

Paul Aitken, Quality Manager, SPL Powerlines UK
