RAIL OPERATIONS TRAINING

A member of the Railway Industry Association and RISQS verified supplier, AARC Professional Services is a railway consultancy that supports all aspects of Rail Operations Training, working closely with clients to gain a real insight into their specific requirements.

Drawing from over five decades of industry experience, we fully recognize the importance of training in the development of a high performing team, helping to design and deliver bespoke courses tailored to meet client needs, with a specific focus on:

COURSE DEVELOPMENT & DESIGN

ON (CLIENT) SITE TRAINING DELIVERY

All of our consultants share a common goal to bring out the best in our rail industry clients, through a professional, collaborative and friendly though determined approach.

From competency planning, content design and quality assurance through to classroom delivery and tabletop exercises, we have the experience and expertise to help you deliver outstanding outcomes.

What our clients' think...

AARCPs was approached to develop a collaborative working relationship with Amey Infrastructure Wales (AIW)/Seilwaith Amey Cymru, in support of its delivery of the Core Valley Lines (CVL) Transformation project – a direct result of the transfer of infrastructure management from Network Rail to Transport for Wales. Initially retained by AIW to provide support on project operational interface work, AARCPs has since been asked to expand its involvement, working on a range of activities from network/project operations and safety & assurance through to operational training design and delivery.

“ Having worked with Steve Derrick and team on several occasions, I have always found them to be very knowledgeable and easy to work with, delivering high quality outcomes on all that they support ”

Colin Hughes, Head of CVL Operations, Amey Infrastructure Wales
